Billi Maintenance Options

Gold Maintenance Plan - Bi-Annual Filter

This plan is recommended when the systems are out of their 24 months initial warranty. It covers all parts, labour, service and non-service items, scheduled and unscheduled engineer visits. It is very popular for companies that require a fixed budget pricing for ongoing maintenance of their taps knowing that their costs are fixed.

Every 6 months

- Scale filter change
- Machine filter change
- Flush filter
- Check temperature sensor readings
- Check hot and cold temperature settings
- Check pump speed
- Check error log
- Visual inspection of tap assembly

Every 12 months

- Scale inspection and check
- Temperature re-calibration

Additional

- All non-service parts
- All engineer visits
