

# Billi™

Instant Boiling, Chilled and Sparkling  
Filtered Drinking Water Systems

# BOILING, CHILLED AND SPARKLING FILTERED WATER

The Billi systems are the ultimate drinking water appliances available in different combinations including boiling, chilled, ambient and sparkling filtered water instantly.

Depending on the model, the chilled water temperature can be adjusted between 2°C and 15°C. The boiling side is also adjustable but it is set at 98.5°C, the perfect temperature for brewing tea.

With adjustable controls up to 5 bar of CO<sub>2</sub> pressure, this offers one of the world's best sparkling water systems.

## SPACE

Billi systems are some of the smallest under-counter units on the market, making them easy to install in any workspace and without any grills (boiling & chilled systems).

## ENERGY

Billi's patented heat-exchange technology recovers and harvests energy to preheat the boiling water, thereby saving up to 40.2% electrical energy.

## TIME

Greatest immediate dispense capacity at 98.5°C from 20 cups to 100 cups, eliminating queues and waiting at high demand times.

## LONDON SHOWROOM

Our state-of-the-art Showroom is a great place to see the Billi Taps in action. You can come along to choose your favourite combination of colours and finishes.

If you have any upcoming meetings, we can provide you with a location and catering. Alternatively, we can bring samples to you across the UK and offer our expertise when and where needed.

For more information, please visit [billi-uk.com/showroom](http://billi-uk.com/showroom).

## TAP RANGE

### Levered dispenser option

The levered dispenser is streamlined and elegant. It is simply operated with position-sensitive levers.

### Touch dispenser option

The touch dispenser is an innovative, contemporary tap, with no levers to interfere with the clean, sophisticated style. It has an operation panel on the top of the tap.

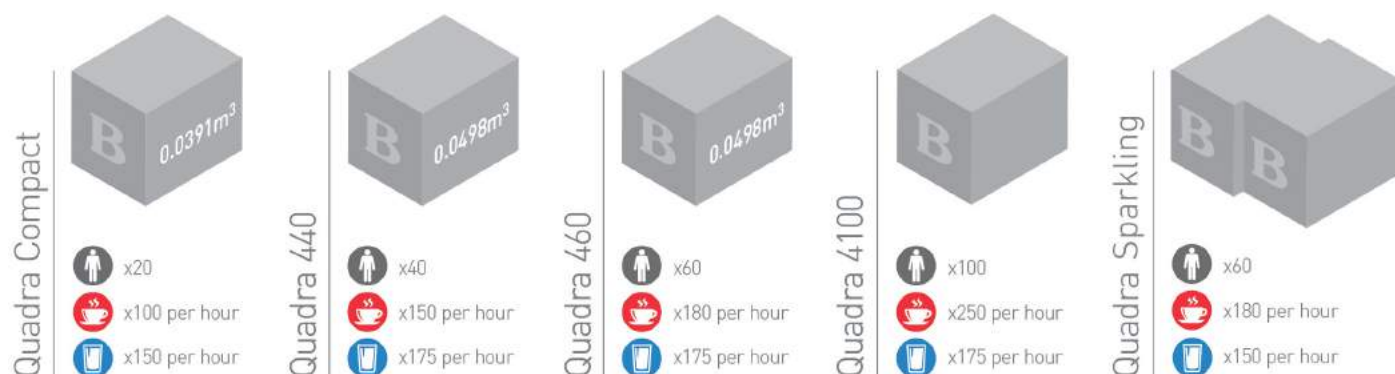

### Remote dispenser option

The remote option is another version of the lever free tap; however the operation panel is located away from the tap. This can be installed in your desired position to meet design requirements.

## UNDER-COUNTER SYSTEMS

Small under counter units with a wide range of capacities available. No need to waste energy with a larger unit than required - from 20 to 100 users per machine. No ventilation is required for boiling and chilled as units run efficiently at low temperatures. All units fit within a 600mm base unit so valuable space is not wasted.

## SUPPORT AND AFTERCARE

Billi systems require regular servicing. There is a range of service and maintenance packages available which can be arranged either through Billi Client Care Team or Billi-approved suppliers.

Each Billi system has 24 months part and labour warranty. This excludes routine servicing. To discuss your requirements for servicing and maintenance, please contact your preferred supplier directly.

For more information including our SLAs, please visit [billi-uk.com/aftercare](http://billi-uk.com/aftercare).

### Silver Plan

A filter replacement performed by a trained technician.

### Gold Plan

Comprehensive maintenance and filter replacement plan.

# THE BILLI STORY

---

The world's first under counter boiling and chilled water system was launched by Billi in the early 1990s. It was instantly recognised as a premium product because of its high functionality, energy efficiency and space-saving design. From that first product, our range has grown to serve the smallest kitchen or work environment, up to the largest buildings with the highest demand.

Today, we continue to innovate. Our designs keep pace with modern building techniques, contemporary interior concepts and changing lifestyle choices. And importantly, all our products continue to incorporate improved eco-technology features.

Welcome to Billi, the number one refreshment solution in the UK.
