The challenge - to implement efficient and sustainable filtered water systems to keep staff well hydrated.

They were looking for high capacity under-counter systems to provide them with energy efficient and sustainable hydration, enhancing the wellbeing and productivity of their staff and clients.

Solution

They went ahead with 9 Billi Quadra 460 systems with XL dispensers, providing instant boiling and chilled filtered water. They also chose 7 Billi Quadra Sparkling 460 systems with XL dispenser taps giving them instant boiling, chilled and additional sparkling filtered water. The dispenser taps, chosen with a Chrome finish and matching drainage font really stand out and catch the eye, contrasting well with the different colour themes on each floor.
